Caches (Writing)

Write-through is slower, but simpler (memory always consistent)/ Write-back is almost always faster (a write-back buffer can hide large eviction cost), but will need a coherency protocol to maintain consistency will all levels of cache and memory

Review: Write-through? Write-back? Block allocation policy ...

Write-back cache discussion The advantage of write-back caches is that not all write operations need to access main memory, as with write-through caches —If a single address is frequently written to, then it doesn't pay to keep writing that data through to main memory —If several bytes within the same cache block are modified, they will

Lecture 18: Snooping vs. Directory Based Coherency

Lecture 18: Snooping vs Directory Based Coherency Professor David A Patterson Computer Science 252 Fall 1996 memory is always up-to-date » Write-back: snoop in caches to find most recent copy Owner must write back when replaced in cache If read sourced from memory, then Private Clean
