Just exercise just what we give under as without difficulty as review **The Elements A Visual Encyclopedia Of The Periodic Table** what you similar to to read!

The Elements A

Chemical element - Wikipedia

Only about 4% of the total mass of the universe is made of atoms or ions, and thus represented by chemical elements This fraction is about 15% of the total matter, with the remainder of the matter (85%) being dark matter The nature of dark matter is unknown, but it is not composed of atoms of chemical elements because it contains no protons, neutrons, or electrons (The remaining non-matter part of the mass of the universe is composed of the even more mysterious dark energy)
